Maral – Ibex

September - December

Ily National park and Dzungarskie Alatua, Tokhty, Zaisan and Taldy Khurgan (Dzungaria) are considered to be the areas with best Maral trophies in all Asia. In fact, two years ago, the new world record was taken there, which exceeded 18 kilos. Regular trophies are up to 10 kilos, but in this area a Maral up to 13-14 kilos can be guaranteed.

The accommodation is in the tents with basic services. The hunt is conducted on horseback or afoot stalking for the Maral in roar. Considering that the ground is rather hilly it takes a good physical preparation to be able to do this kind of hunt. In the same area there is a very numerous population of Siberian Ibex that can be hunted either combined with the Maral or as a separate program.

Rates:

| | |
|--|------------|
| 14/11 hunting days including one Maral without weight limit | USD 14.900 |
| 11/8 hunting days including one Siberian Ibex up to 130cm | USD 9.900 |
